

Coding Challenge 4 - Solution

Solution-

```
<!DOCTYPE html>
  <head>
    <title>Click and load events</title>
  </head>
  <body>
    <button id="btn">Button</button>
  </body>
  <script>
    window.onabort=alert("The page contains a button");

    var btn=document.querySelector('#btn');

    btn.onclick=function() {
      console.log("Button Clicked")
    }

  </script>
</html>
```
