

Styling Ecommerce Application

Introduction

This week we will be **styling the admin side view for Ecommerce Application**. We will be styling the static web pages we built using CSS.

Housekeeping points

- This is a minimal example and may not follow some standard practices.
- We focus on the main flow, and not much error handling.

Problem Statement

A. We will be styling the following web pages of admin side view-

1. Style Admin Dashboard –

Style the admin_page.html webpage to give it a dashboard look and feel.

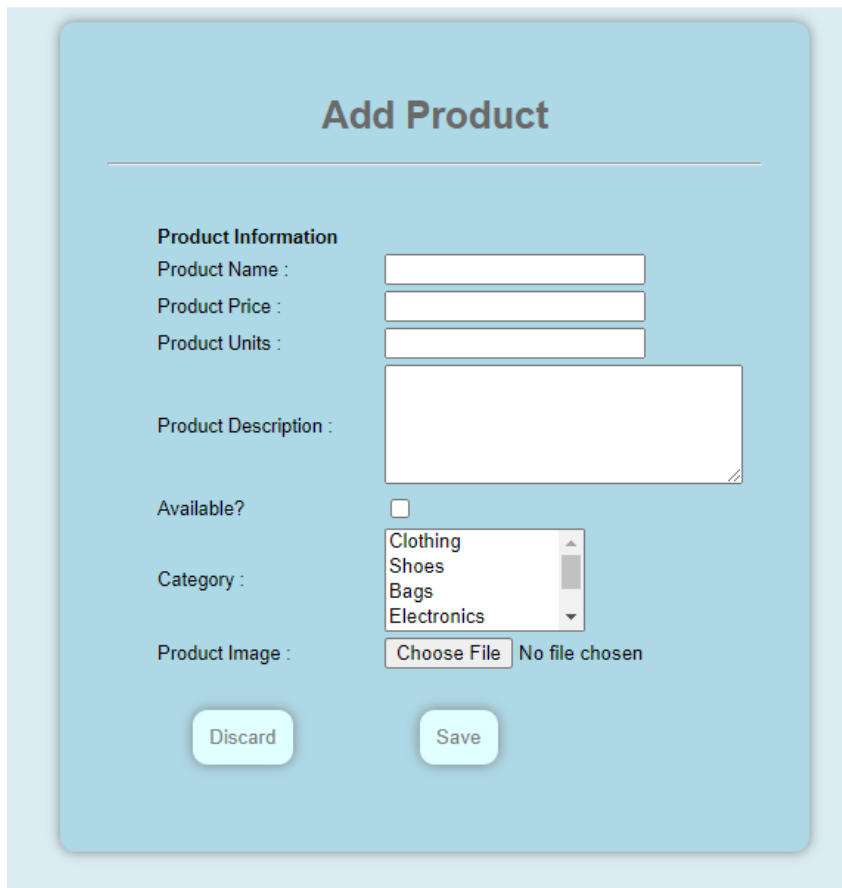

An image of sample webpage is given –

2. Style Web Pages for Create & Order details Operation –

Style the `add_category.html`, `add_product.html` and `order_detail.html` so that all these webpages have uniform and consistent styling.

An image of sample `add_product` webpage is given –

The image shows a web form titled "Add Product" with a light blue background. The form contains the following fields and controls:

- Product Information** (Section Header)
- Product Name :** A single-line text input field.
- Product Price :** A single-line text input field.
- Product Units :** A single-line text input field.
- Product Description :** A multi-line text area.
- Available?** A checkbox.
- Category :** A dropdown menu with the following options: Clothing, Shoes, Bags, and Electronics.
- Product Image :** A file upload control with a "Choose File" button and the text "No file chosen".
- Buttons:** "Discard" and "Save" buttons at the bottom.

3. Style Web Pages for List and Update Operation–

Style the list_categories.html, list_products.html, list_orders.html and update_order.html so that all these webpages have uniform and consistent styling.

An image of sample list_products webpage is given –

All Products
