

Coding Challenge 2 - Solution

Solution-

```
<!DOCTYPE html>
<head>
  <title>GetElementByIdAndClass</title>
</head>
<body>
  <h2 class="header">This is demo h2 heading.We will use this
element to perform various operation on it using JS code.</h2>
  <h3 class="header">This is demo h3 heading.We will use this
element to perform various operation on it using JS code.</h2>
  <p class="paragraph">This is the first demo paragraph.It has
content to apply various js operation on it.</p>
  <p class="paragraph">This is the second demo paragraph.It has
content to apply various js operation on it.</p>
  <div id="div">This is a demo div.It doesn't have any futher child
tags inside it till now.</div>
</body>
<script>
  var h2=document.getElementsByClassName('header')
  var p=document.getElementsByClassName('paragraph')
  var div=document.getElementById('div')

  for(var i=0;i<p.length;i++)
  {
    console.log(p[i]);
    p[i].innerText="PARAGRAPH";

  }

  for(var i=0;i<h2.length;i++)
  {
    h2[i].innerText="HEADING";
  }

  div.innerHTML='<h1>This heading is inserted using JS CODE</h2>';

</script>
</html>
```
